

Canada's Negative Emission Technologies & CCUS Virtual Tour

JOIN US ON MAY 18TH, 19TH AND 20TH 2021 FROM 4PM-6PM CEST
[REGISTER HERE](#)

This invitation-only event showcases the Canadian negative-emission Ecosystem to strategic partners, buyers and investors from Europe, coordinated with Canadian Embassies across Europe. We have secured the participation of several world-class keynotes, please see the program below.

On each of the days we will dedicate 2 hours to dive into 3 topics that will be crucial to getting to Net Zero by 2050: Capture, Storage, and Utilization of CO₂. Canada has a long historic expertise in this topic, and we will have keynotes, pitches and a roundtable discussion with Canadian and European leaders in these technologies. Have a look at the [2020 Carbontech Report](#) to get an overview of the Canadian Ecosystem

This event is organized by the Trade Commissioner Service (TCS) of Global Affairs Canada. During and after the event, Trade Commissioners offer to arrange individual B2B meetings and will help with specific introductions to advance business relationships.
